

# Iosif V.

## Software Engineer

London, UK

<https://iosifv.com> [hire-me@iosifv.com](mailto:hire-me@iosifv.com) [+44.759.713.7739](tel:+447597137739)

[iosifv](#) [iosifv](#) [iosifv](#)

Hey there I'm Iosif, a senior Backend Engineer with experience in creating complete projects from start to finish in Node.js and PHP. I write code as clean as possible so that the next dev will be happy to maintain it and the junior will quickly grasp it. Curious by nature, I'm always willing to learn new things, so these days I spend my evenings working with Solidity and Hardhat on creating Blockchain smart contracts.

### SKILLS

#### Languages

Node.js   Typescript   PHP  
Solidity   bash

#### Frameworks

Laravel   Express   Serverless  
Hardhat

#### Admin

AWS   CI / CD   Docker  
Shell Scripting

### WORK EXPERIENCE (10)

#### Software Engineer at Freelancer

**Aug 2020 - Current**

<https://casa4.co.uk/>

Contractor for various clients on different projects & extra work on personal projects

- Currently focusing on blockchain projects. As a side, improving my dev-ops skills and working on some Laravel websites.
- Technologies: Hardhat, Solidity, PHP 8, Laravel 8, Laravel 9, Laravel Forge, AWS, VueJS, Node.js, Nuxt JS, CLI, Bash

#### Software Engineer at True Compliance

**Oct 2020 - Aug 2022**

<https://truecompliance.co.uk/>

Cloud Based Compliance Management System.

- Worked on building the main API of the system. Contributed to all the adjacent applications which constituted the entire ecosystem deployed as serverless functions on AWS with Laravel Vapor. Involved in designing some parts of the ecosystem's architecture.
- Some notable projects were a full reporting application which would create a report from any SQL provided. A system to serve real time data faster to the end client; by saving all the processed relational data into a no-sql database thus providing instant access to the transformed client-friendly set of the data.
- Technologies: PHP 7, PHP 8, Laravel 8, Laravel 9, Laravel Vapor, AWS, VueJS, Node.js, Serverless Framework, CLI, Bash

#### Software Engineer at Freelancer

**Oct 2019 - Sep 2020**

<https://casa4.co.uk/>

Contractor for various clients on different projects & extra work on personal projects

- Created a complete invoicing application from design to production. This is reading data from XMLs deployed daily on external FTP servers, then joins and transforms them into beautifully organised information easy to interact with. Built with AWS Lambda functions in Node.js using the Serverless Framework and DynamoDB.
- Technologies: Serverless-Framework, Node.js, TypeScript, Laravel, VueJS, AWS, Lambda, EC2, S3, IAM, RDS, DynamoDB, API Gateway

**Software Engineer** at Skin Analytics

**Oct 2018 - Oct 2019**

🔗 <https://skin-analytics.com/>

Designing and developing our main AI Skin Analytics applications and keeping an eye on the AWS infrastructure.

- Biggest task was a migration from a no-sql database to a relational database which resulted in a 11x speed increase. All this was achieved with 100% transparency to the end user.
- Technologies: Node.js, Express.js, TypeScript, AWS, Loopback, pm2, Angular

**PHP Application Developer** at Freelancer

**Jul 2018 - Nov 2018**

🔗 <https://casa4.co.uk/>

Worked with various clients on Symfony or Laravel Projects.

- For each client I worked with, I was submitting pull requests in the first day.
- Biggest project was a complex tool-renting platform written in Laravel where I worked in a team of about 20 developers
- Technologies: Laravel 5.6, Symfony, PHP 7.1, MySql, Git, PHPUnit

**PHP Application Developer / Dev-Ops** at Woooba

**Feb 2017 - Jun 2018**

🔗 <https://www.woooba.io/>

Designing, developing & supporting client applications.

- Developed & maintained nationwide educational platforms. Designed and integrated various APIs.
- We built a complete financial management application.
- Managed all our DigitalOcean droplets with a CI setup.
- Technologies: Laravel, DigitalOcean, Laravel Forge, PHP 5.6, PHP 7.1, RESTful APIs, MySql, Git, CLI, VueJS, PHPUnit.

**PHP Application Developer** at iQU Group

**Nov 2015 - Nov 2016**

🔗 <https://iqu.com/>

Marketing solutions for game developers.

- Created complete APIs from start to end as well as libraries which were used by my colleagues.
- Another smaller project was built with Java and PipelineDB.
- Technologies: PHP, Laravel, Symfony, API, MySQL, Git, Docker, CLI, PHPUnit, AngularJS, Java

**PHP Application Developer** at Project 89109

**Oct 2014 - Nov 2015**

Online adult dating services.

- Technologies: PHP, API, MySQL, CLI, Git, JS, jQuery.

**Hardware Engineer / Dev-Ops** at Hidden Hash (Personal Venture)

**Nov 2017 - Current**

Family business dealing with mining crypto-currencies.

- Worked on Business model, Hardware setup, Software & security optimization/tweaks/updates, Performance fine tuning, Trading generated assets.
- Learned a lot about managing a larger than usual number of computers and hardware components.
- Built an open-source watchdog mechanism for certain types of graphic cards (<https://github.com/iosifv/amd-vega-startup-scripts>).

**Photographer** at Saya Studio (Personal Venture)

**May 2005 - Dec 2014**

Photography studio focusing mainly on weddings.

- Worked on Client handling, Marketing, Accounting, Management, Photographing, Retouching, Graphic design, Web-design.

## PROJECTS (3)

---

### Terminal ToolBelt

🔗 <https://github.com/iosifv/terminal-toolbelt>

- Open source collection of aliases and bash functions which I use.
- Organised in something which resembles a CLI Framework.

### Silence

🔗 <https://github.com/iosifv/silence>

- Open source tool for safely backing up ssh keys in a git repository

### iosifv.com

🔗 <https://github.com/iosifv/iosifv-copy>

- A copy of the repository of my website.
- Backend management system written in Laravel. Includes a photo gallery, quotes collection and a really cool json generated CV.

## EDUCATION (2)

---

**Masters Management and Business Engineering** at Technical University of Cluj-Napoca

**2010 - 2012**

General management theories

**Masters Computer Science** at Technical University of Cluj-Napoca

**2004 - 2009**

C++

Java

.NET

SQL

Lisp

Prolog

Xilinx

Assembly

x86 processor

Electronics

Physics

## LANGUAGES

---

### English

*Advanced*

### Romanian

*Native speaker*

### Hungarian

*Beginner*

## INTERESTS

---

### Hobbies

Chess

HiFi Music

Photography
